Program Description:

Western's University Transfer programs are equivalent to the first- and second-year general education courses offered at traditional universities. Our Associate of Science program prepares you for Bachelor of Science programs in the University of Wisconsin System as well as many other four-year transfer partners.

General education courses include English, math, science, history, social sciences, the humanities, and health and wellness courses. You could save 40 percent by taking these AS degree courses at Western before transferring to a four-year program of study in the natural and physical sciences or social sciences!
