### Program Description:

If you're considering a four-year college or university, consider this: earning an Associate of Science-Liberal Arts degree at Western could save you 40 percent over the cost of a four-year university in Wisconsin, and it's one-sixth the cost of the average private college. You could save thousands of dollars, take on much less debt, and graduate with the same degree! If you have a particular college or university in mind, you'll want to check out how your credits will transfer before enrolling. The Associate of Science-Liberal Arts degree program provides a solid foundation in what is typically known as "general education." If you are undecided about a major, this degree program will expose you to a wide variety of courses and help you develop insight into which career areas you'd like to explore further. The curriculum is comparable to the coursework offered in the first or second year of a four-year college program and includes English, math, science, history, social sciences, the
